Brainstorming

Project Title

AI Learning Assistant Using Emotion Detection and Google Gemini AI

Problem Statement

Many students face difficulties while learning online due to confusion, frustration, boredom, or lack of motivation. Existing learning platforms provide the same content to all learners without understanding their emotional state.

Idea Generation

Idea 1

Create an AI chatbot to answer student questions.

Idea 2

Develop an emotion detection system that identifies students' emotions from text input.

Idea 3 (Selected)

Build an AI Learning Assistant that detects the learner's emotion using BERT and BiLSTM models and generates personalized learning guidance using the Google Gemini API.

Objective

- Detect learner emotions.
- Provide personalized learning suggestions.
- Improve student engagement.
- Support self-paced learning.

Expected Outcome

An intelligent learning assistant that understands learner emotions and provides appropriate AI-generated guidance.
