Proposed Solution

Overview

The AI Learning Assistant is an intelligent educational platform designed to identify students' emotional states and provide personalized learning guidance.

Working Process

1. User enters a learning-related problem.
2. Text is preprocessed.
3. Emotion is predicted using BERT and BiLSTM models.
4. The detected emotion is sent to Google Gemini AI.
5. Gemini generates personalized learning advice.
6. The response is displayed to the user.
7. Session history is stored.

Features

- Emotion Detection
- Personalized AI Guidance
- Session History
- User-Friendly Interface
- Real-Time Response
- AI-Based Learning Support

Advantages

- Better learning experience
- Reduced frustration
- Increased confidence
- Personalized recommendations
